

ASSEMBLING THE GHOST DRAGON

1. Attach the Tail to the Body.
2. Attach the Neck to the Body.

If you are familiar with pinning parts together, adding a pin between these parts is recommended, but not necessary.

If not adding pins, epoxy is recommended to attach the pieces. Super-Glue will work, but is less durable for such large pieces. Allow for each part to fully dry [or cure] before attaching the next piece.

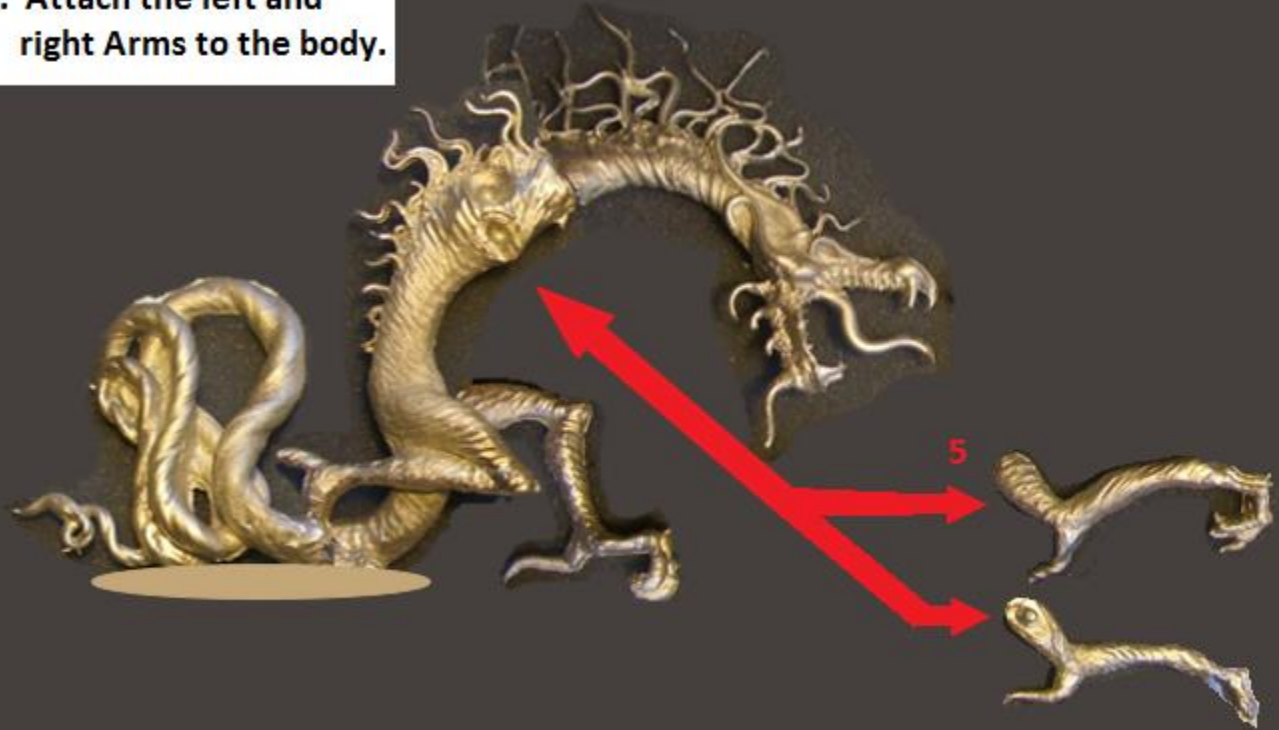

ASSEMBLING THE GHOST DRAGON

3. Attach the Base to the bottom of the Dragon.
4. Attach the separate Leg to the body.

ASSEMBLING THE GHOST DRAGON

5. Attach the left and right Arms to the body.

ASSEMBLING THE GHOST DRAGON

6. Attach the left and right wings to the upper sockets of the body. Using Pins or Epoxy to affix the wings is recommended.

ASSEMBLING THE GHOST DRAGON

- 7. Bend the wings and appendages to have a flowing look.**
- 8. Your built dragon should look similar to this.**
